## Word of Mouth

A QUARTERLY NEWSLETTER TO THE PATIENTS & FRIENDS OF  
DR. STEVEN HUTT, D.D.S., P.A.

### Hutt Dentistry Launches New Website

[www.huttdentistry.com](http://www.huttdentistry.com)

To go along with our "Smile Confidence" logo we have redesigned our old website and created a new interactive site which we are very proud of. We have packed it with information about everything you could possibly want to know about dentistry. It tells you who we are, what we do and how we do it. It allows you to download forms, ask questions and soon even to schedule your appointments.

All of us at Hutt Dentistry hope you will visit our site and use it as a reference for your friends. You may refer them to our site as a source of information about us and to familiarize them with our practice. Our secure online registration forms (health history, dental history) can be downloaded and filled out in the comfort of your home.

Our practice continues to grow by word of mouth referrals from patients like you. That is still the best form of advertising by referring your friends and family to our site. They can get to know us before they arrive for their first appointment. Thanks in advance for your continued support.

### Our Mission is to....

- Offer the finest reconstructive and cosmetic dental services to benefit our patients' health and quality of life.
- Provide affordable, high quality, comfortable dental care.
- Treat every patient with respect, dignity and concern.
- Promote long term patient relationships through quality care and patient education.
- Attain a level of service that will strive toward 100% patient satisfaction.

## Turn Back the Clock

It seems that nearly every month new research findings are announced that link oral health to systemic health. If nothing else, you've likely read something in the last year correlating gum inflammation with heart disease. The truth is that dentists have long known that maintaining healthy gums and teeth is critical to keeping your teeth for your lifetime, for optimizing your long term general health, and for maintaining the quality of your life as you age. Think about it: a healthy mouth improves your odds of living a long and happy life.

Even if you have not thought about slowing down the aging process "dentally," you may have thought about rejuvenating your appearance by whitening your teeth, replacing old silver fillings with tooth-colored ones, and repairing worn down and cracked teeth.

Bacteria find the mouth to be a very hospitable place to live. Bacteria can readily cause gum irritation and inflammation and still go unnoticed because the increased redness is subtle, and the tenderness and bleeding occur only occasionally. It is easy to believe your mouth is fairly healthy even when it isn't.

## Eliminate That Metal

Do you have gold or metal fillings in your back teeth? Do they change the way you smile? Dr. Hutt can replace those materials with restorative materials that look white and natural.

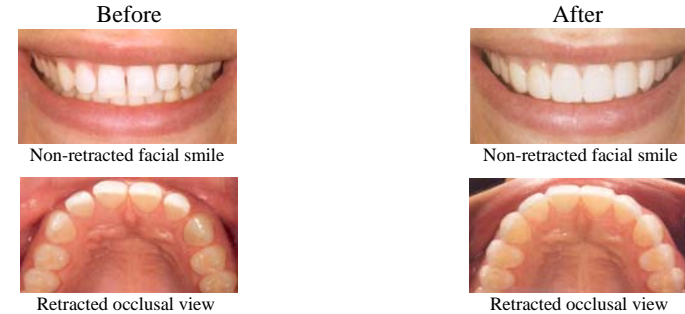

Adhesive bonding an inlay/onlay preserves your natural tooth structure and provides beautiful aesthetics. The treatment is conservative and will strengthen the tooth due to the adhesive pulling together effect of the bond.

## No Prep Veneers

These before and after photos show what can be done without any removal of tooth structure.

This smile makeover only required 2 visits. It did not require any shots, any numbing, or any drilling. No tooth structure was removed. Impressions were made of the existing teeth and these contact lens thin porcelain veneers were bonded onto the 10 upper teeth. Since no tooth structure was removed the adhesion to the tooth enamel was optimized. The strongest bond you can achieve is when all enamel is present.

92% of Americans believe that an attractive smile is an important social asset; yet only 1 out of 2 people are satisfied with their smile.

## Oral Cancer Awareness

### Know the Facts and Make a Difference.

30,000 Americans will be diagnosed with oral or pharyngeal cancer this year. It will cause over 8,000 deaths, killing one person per hour, 24 hours per day.

Ask about our non invasive Vizilite exam for early detection of oral cancer. It can save lives or disfiguring surgery of the head and neck.
