

## We Offer No Interest Payment Plans

...So Everyone Can Have a Healthy and Beautiful Smile Today!

We offer CareCredit<sup>®</sup> because your smile is important to us. CareCredit<sup>®</sup> is a convenient, low minimum monthly payment program for your entire family specifically designed to pay for healthcare and elective treatment not covered by insurance.

### ***3, 6, or 12 Month No Interest Payment Plans***

- Pay for treatment over 3, 6, or 12 months with no interest.
- As long as you pay the low minimum monthly payment each month when due, and the balance in full by the end of the 3, 6, or 12 month term, no interest will be charged.

## Word of Mouth

A QUARTERLY NEWSLETTER TO THE PATIENTS & FRIENDS OF  
DR. STEVEN HUTT, D.D.S., P.A.

## Free Whitening Gel Kit for Life

The public interest in cosmetic dentistry has grown in epidemic proportions. *Smile Confidence* means more than having a pretty smile. The condition of your dental restorations must be maintained, as well as, keeping you free of periodontal disease. This is a total life program.

As part of our commitment to you we have designed our free whitening gel for life program. For those patients who are candidates and desire tooth whitening procedures we have created a win-win scenario. Just as quality dentistry needs to be maintained, so does tooth whitening. If you come in for the new Zoom office whitening procedure (Zoom 3) and have custom whitening trays made for at home maintenance, we will provide you with free whitening gel for life. Your only obligation is to maintain your periodic hygiene and/or periodontal maintenance visits based on our recommended protocol for you to maintain oral health.

In other words, as long as you come in for your maintenance appointments as scheduled we will give you one free whitening gel kit at your scheduled appointment.

As an added bonus for you, it's been shown that teeth whitening is actually healthy for your gums due to the action of the peroxide. Call us for more information.

Get ready to **ZOOM!**

## Lumineers®

“The only thing that warms the heart as much as a beautiful song is a beautiful smile.” ...Garth Brooks

Before you read another word, walk over to the mirror. Now say “cheese.” What do you see? Is your smile dark and dingy or healthy and bright? Are you completely happy with your smile? Your smile is the first thing people notice about you. Who can resist a beautiful smile?

Even if you don't care how you look, other people do. It's a fact that people respond favorably to a nice smile. You feel more confident with a million dollar smile and it's easy.

LUMINEERS® is a painless, permanent cosmetic solution for stained, chipped, discolored, or misaligned teeth, unlike traditional porcelain veneers that require painful removal of sensitive tooth structure.

*For a Perfect, Natural-Looking Smile  
Painlessly, Pleasantly, Permanently*

***No shots - No removal of painful tooth structure  
No pain - Not even an aspirin***

LUMINEERS® porcelain veneers combine a bonding system with patented LUMINEERS® technology, the only system proven to last over 20 years. LUMINEERS® is made as thin as a contact lens and placed over existing teeth (even unsightly crowns) without removing any painful tooth structure.

## What are Your Numbers?

### Are harmful bacteria infecting your foundation?

Your gums and underlying bone provide an important foundation for your teeth and dental work, so it's important to keep them healthy. And while every mouth contains both healthy and harmful bacteria, sometimes the harmful bacteria can infect the gums and form spaces or gaps around the teeth, known as pockets. These pockets are a sign that you may have periodontal disease (gum disease) - the #1 cause of adult tooth loss in the United States.

**A pocket 4mm or more in size may mean you have an infection.**

Our fully calibrated periodontal probe can give you a printout of your entire mouth (like an EKG).

## The Benefits of Implants

A dental implant is a permanent, fixed way to replace a missing tooth or multiple missing teeth.

Implants have many advantages over dentures, bridges, and other prostheses. Implants will:

- Replace teeth missing since birth or lost to periodontal disease, infection, trauma, or decay.
- Replace single or multiple teeth.
- Become a permanent part of the mouth, integrated with the surrounding bone.
- Not slip, move, or irritate gum tissue, unlike dentures.
- Provide patients a secure and stable fit.
- Restore up to 90% of chewing power lost with missing teeth.
- Minimize jawbone degeneration from missing teeth.
- Improve the quality of life for a significant majority of patients.
- Give patients more confidence when speaking and chewing.
